

## Declaration of Conformity

Tempress A/S hereby declares that the following products

The wetted Parts of the Diaphragm seals.

This is only valid for Metallic Diaphragm seals.

Surface roughness of original sheet have a value of Ra 0.2.

The punching and stamping of the diaphragm are made by means of rubber tooling, which do not harm the surface what so ever.

The welding is random tested to a Ra < 0,8 without any further treatment.

The random measurements are done according the specifications in  
EN ISO 4288:1998 Ra 0.1-2

After polishing the value Ra < 0.5

Surface roughness certificates are made if required by customer according to EN ISO 4288:1998 Ra 0.1-2

7 random measurements along the weld the measuring length is 0,8mm for each of the random spots tested.

*The DoC is available at Tempress A/S website [www.tempress.dk](http://www.tempress.dk).*
